# Ashish Ranjan

GAME DEVELOPMENT / GAMEPLAY SYSTEMS / TECHNICAL ART

Bengaluru, India | ashish.mitblr2023@learner.manipal.edu

github.com/SheesshhOfficial | linkedin.com/in/sheesshh

## PROFILE

Computer Science & Engineering undergraduate with a focus on Unreal Engine gameplay systems and technical art. Interested in game-development opportunities and freelance project conversations.

## TOOLS AND AREAS OF FOCUS

Unreal Engine 5, C++, Blueprints, Enhanced Input, Git and Blender. Areas of study include networked gameplay, character interaction, combat and round flow, animation assets, and 3D content pipelines.

## SELECTED PROJECT STUDIES - SHEESHH PROP HUNT

**Unreal Engine multiplayer hide-and-seek project**

Prop transformation: inspected Blueprint logic includes target selection, server-side resource checks, multicast mesh updates, and fixed pivot offsets for selected meshes.

Gameplay systems: portfolio studies cover decoy placement, weapon traces and damage, spectator transitions, round lifecycle, spatial taunts, VOIP packet clearing, and character customization.

Technical art: project files include IK Rig, IK Retargeter, and physics assets. Internal setup, motion quality, and original asset authorship require further documentation.

## EDUCATION

**Manipal Institute of Technology, Bengaluru**

B.Tech in Computer Science & Engineering - Expected graduation: 2027

## EVIDENCE AND CONTRIBUTION NOTE

This profile summarizes supplied background and inspected project studies. Blueprint/source inspection establishes implementation structure, not runtime reliability. Individual contributions, third-party credits, and gameplay recordings will accompany the final case studies.
